MAX PAYOUT!

or Bust

9 Prize Lights

This Game Excites!

Each lucky player spins the wheel to determine how many chances they have to reach their "Max Payout" or go BUST!

Players are awarded chips equaling the value of their wheel spin which they can use for chances to press any of the 20 random prize buttons. The player can opt to keep a prize or give it back and use any remaining chips.

With each new player, the machine operator "shuffles" the prize sequence with the push of a button, creating a totally random pattern.

**ORDER YOUR NEW MONEY MACHINE
FROM FUN INDUSTRIES, INC.
WITH OUR ALL NEW PATENTED
SMART START® TECHNOLOGY**

**NEW
DISPLAYS!**

**INTERACTIVE
PLAYER
BUTTONS!**

US PATENT #8,206,232

Introducing Smart Start® technology by Fun Industries, Inc.
This patented new feature minimizes the chances of a player
“cheating” while inside the machine. Smart Start® requires the player to hold a
set of buttons while the machine activates the “countdown” displays and gets
the money circulating. Once the displays turn green, the timer starts and the player
is allowed to release the buttons and catch all that they can. Failure by the player
to follow the basic start up instructions will shut off the machine and require
the player to restart the sequence. See the next page for complete instructions.
